EDUCATION

Northeastern University, Khoury College of Computer Sciences

Boston, MA

Candidate for Bachelor of Science in Computer Science and Design

September 2023 – April 2027

GPA: 3.7/4.0

Relevant Coursework: Foundations of Software Engineering (graduate course), Algorithms, Discrete Structures, Cloud Computing (partnered with AWS Skills Center), Prototyping with Code, Database Design, Object-Oriented Design, Human-Computer Interaction, Designing Interactive Experiences, Fundamentals of Computer Science 1 & 2

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, TypeScript, Java, Kotlin, Dart, Processing, C#, C++, Ruby on Rails

Frameworks/Libraries: React, React Native, Node.js, Next.js, Angular, PyTorch, Cloud Computing, REST API

Tools: MySQL, MongoDB, Pandas, Git, Cucumber, Cypress, Docker, Amazon Web Services, Power BI, Tableau

Project Management: Microsoft Excel, Unified Modeling Language diagrams, Atlassian Jira, Agile (Scrum, Kanban)

Operating Systems: Windows, Linux, macOS, iOS, Android

EXPERIENCE

MFS Investment Management

Boston, MA

Incoming DevSecOps Co-op

Fall 2025

- Research and experiment with new technologies to improve delivery pipelines and cloud adoption.

Google

Seattle, WA

Software Engineer Intern

May 2025 – Present

- Led the development of a proxy solution for Flutter web, **accelerating the project completion by 50%**
- Implemented a web development configuration file, streamlining the developer experience for **2 million engineers**
- Enhanced feature usability by leading research into competing UI frameworks, publishing a detailed design document, and presenting a prototype to the Google Dart team to integrate critical feedback

Headstarter AI

Software Engineering Fellow

July 2024 – September 2024

- Programmed **5 AI projects** leveraging **Pinecone** as a scalable vector database, utilizing **OpenAI API** and **Gemini API** for advanced NLP and generative tasks, and implementing **embeddings** for semantic matching
- Analyzed user and site traffic data to explore strategies for reaching **1,000+ users**

Popper

Corona, CA

Mobile Engineer Intern

May 2024 – September 2024

- Enhanced the user experience design of the market and event screens, increasing the engagement time by **500%**
- Implemented account deletion and deals for **500+ users, 20+ businesses** using **React Native** and **Firestore**
- Integrated CI/CD for rapid feedback integration and debugging via TestFlight, increasing active users by **30%**

theCoderSchool

San Mateo, CA

Coding Instructor

January 2022 – July 2024

- Mentored 10 students in Python after **9 years of private coding lessons** and placing **3rd** among **5,000 students** at the nationwide Coder Games

PROJECTS

Flashcard SaaS | *Stripe API, Clerk API, OpenAI API, Google Cloud, Next.js*

July 2024 – Present

- Build a baseline in STEM for preschool and elementary students using generative artificial intelligence flashcards
- Partnered with Northeastern Jumpstart and **3 preschools** to research and understand how children learn best
- **1 of 3 students** recognized as a **Northeastern Research Justice at the Intersections Scholar** for their dedication to making technology more accessible to marginalized communities

Headshot News | *headshotnews.com | HTML/CSS, React, Node.js, Google Cloud*

May 2024 – July 2024

- Designed and programmed a full-stack news aggregator, using **Firestore** to store and update the articles daily
- Web scraped **5 Esports sites** using **Puppeteer**, **BeautifulSoup**, and **Selenium** for parsing and data collection
- Incorporated A/B testing and user research using the Agile methodology to drive decisions
- Placed **3rd** in the Northeastern Husky Startup Challenge

Nutritional Pal | *AI-Bloks, RAG, Python, speechRecognition, Tkinter, and pyttsx3 libraries*

May 2024 – June 2024

- Experimented with **3 open source LLMs** and machine learning to answer questions on nutrition information
- Increased the **llmware/bling-1b-0.1** model's accuracy by **50%** by optimizing the data configuration
- Integrated natural language processing and speech recognition to process speech inputs and convert text outputs into speech, enhancing user interaction and accessibility
